Credit risk arises from the possibility that a counter-party may be unable to meet the terms of a contract in which the Bank has a gain position. The credit risk numbers as at end of the financial first quarter are reflected in Note 31 on Capital Adequacy. The credit risk amount will increase or decrease over the life of the contracts, mainly as a function of maturity dates and market rate or prices.

### D Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its cash flow obligations as they fall due, such as upon the maturity of deposits and loan draw downs. Exposure to liquidity risk is reduced through constant monitoring of liquidity risk profile with maturity mismatch reports.
